## **UNDERSTANDING ENVIRONMENT (Eco Eureka Kit)**

This exhibition display focuses on key areas of study related with environment through experimentation to explore and understand the gifts of nature. The activity manual of the Eco Eureka Kit has activities under 5 thematic sections namely

- Water
- Soil
- Biodiversity
- Earth & Atmosphere and
- Astronomy

It will examine and experiment the nature and its living & nonliving components with easy tools and techniques in stress free playful manner. It will serve as accessible facility for 'learn by doing', 'do by learning'. This kit can be best used by teachers as a teaching aid to transact classroom teaching with experimentation in an eco-friendly, low cost and attractive way for grass root levels of study in an innovative way.
